Travel to Higher Risk Destinations – CSU Protocol

To protect student health and safety, Colorado State University categorizes travel destinations into three groups based on U.S. Department of State and insurance provider information: Low to Medium Risk, High Risk and Extreme Risk. The countries listed below are assessed as having high or extreme risk related to health, safety and/or security. Any CSU student (undergraduate, graduate or post-doc) traveling to any country listed below must complete a petition process with the International Travel Oversight Committee (ITOC) prior to travel.

Designations are not static and may change based on country or world conditions.
